

SEO ARCADE · PARTNER KIT

White-Label Podcast Production

Produced under your brand. Engineered as an
SEO asset — links, entities, AI-search citations.

PAASS · Podcasting As An SEO Service

For agency partners

Resell it as your own, or refer it and stay out of the way.

THE OFFER IN ONE PAGE

Podcast production, built by SEOs

We are a done-for-you, white-label podcast production service built by SEOs. We find expert hosts and guests, run the recording, and turn every episode into subject-matter content, links, and authority — without your client touching the production, and without your team learning to be a podcast studio.

Most podcast production shops optimise for audio quality and download counts. We optimise for search visibility and links. Same polished production, pointed at outcomes a marketing team can actually measure.

WHAT WHITE-LABEL MEANS HERE

Podcast production delivered under your brand. We do the hosting, guests, editing, and content. You (or your agency) present it as your own. Your client never has to know the production desk isn't down your hallway.

WHY AN AGENCY WOULD WANT THIS

It is a content line and a link line at the same time. One 45-minute recording yields 3,000–4,000 words of original, expert content plus a syndicated citation footprint — sold as one deliverable, billed monthly, delivered by someone else.

- **New revenue on existing accounts** — a service you can sell into clients you already have, with no hiring.
- **No production overhead** — no gear, no editor, no booker, no scheduling headache on your side.
- **It fits your retainer story** — it produces content, links and AI-visibility signals, which is what you are already being paid for.
- **Or just refer it** — if you would rather not carry the account at all, hand it over and we run it directly.

THE DELIVERABLE

What your client actually receives

Per episode. Every item below is included in production — not an upsell list.

PRODUCTION

- Show strategy, format, and topic planning
- Sourcing expert hosts and booking the right guests
- Recording, editing, and audio cleanup
- An optimised show-notes page with links

CONTENT OUT OF THE SAME CONVERSATION

- Two subject-matter articles per episode
- A guest recap post that links back to those articles
- Transcript plus “useful quotes” content used to strengthen existing service pages and posts
- Short clips cut for social

DISTRIBUTION

- Syndication to 30+ podcast directories
- Supporting posts on Substack, Reddit and LinkedIn

Most shows publish the audio and stop — leaving the majority of the SEO value on the floor.

THE MECHANISM

What it produces in links and AI visibility

This is the part worth explaining to a client, because it is the part that separates a podcast from a hobby.

A PODCAST APPEARANCE IS A CITATION

Search engines and LLMs do not see audio. They see a brand mention, an author entity, and a fresh syndicated page that links back. When a guest is interviewed, their name and topics start appearing across podcast directories within hours. That is an entity signal, and it is exactly what AI search uses to decide who to cite.

A podcast appearance is an SEO event. It absolutely is.

Jason Wade, SEO — on the *Unscripted SEO* podcast

THE LINK FOOTPRINT PER EPISODE

- A show-notes page that carries links
- Syndication across 30+ podcast directories
- A guest recap post linking back to the two subject-matter articles
- “Barnacle” reposts on LinkedIn, Reddit and Substack, each carrying links

One recording becomes a small web of relevant, contextual links — the kind that still move rankings because they are about the right topic, not bought.

GUESTING IS THE FAST VERSION

Booking a client onto other people's shows borrows an existing audience, gets their name indexed across someone else's distribution, and collects a citation without publishing a thing. We book clients onto shows, not just produce their own.

COMMERCIALS

Published rates, no long-term contracts

These are the public rates on seoarcade.com/pricing/. Nothing here is a partner-only number — what a partner arrangement looks like is the conversation, not the rate card.

Podcast Episode Production**\$600 / episode**

A fully produced guest interview episode that doubles as an SEO content and link-earning asset (the PAASS method).

Link Building**\$150 / link**

Managed link acquisition — branded or non-branded — earned through real relationships, digital PR, and the podcast network.

The Everything Package**\$5,000 / month**

4 podcast episodes per month, 10 links per month, unlimited keyword research & forecast reports, 1 community park cleanup, and 5 hours of hands-on execution, 1:1 strategy or team training. Equivalent services billed separately run about \$5,720/mo.

HOW THE RELATIONSHIP WORKS

- **Resell it.** You buy production at the published rate, present it under your brand, and price it to your client however you price everything else. We stay invisible.
- **Refer it.** You introduce the client, we run the engagement directly, and we agree the referral arrangement up front.
- **No long-term contracts.** Month to month, on either path.

Done-for-you podcast production typically runs in the low-thousands per month across the industry, depending on episode frequency, whether video is included, and how much guest booking and repurposing is bundled in. Because we build for SEO outcomes, we scope each engagement to the content and link volume actually needed — book a call and we will quote it straight.

FIT

Who this works for, and what happens next

THE CLIENTS THIS SUITS

- B2B brands that want thought-leadership content and qualified-lead conversations on autopilot
- Agencies looking for a white-label podcast production partner to resell under their own brand
- Consultants and founders who want authority and backlinks without becoming a full-time producer
- Local and service businesses using interviews to build relationships and local relevance

WHAT WE NEED FROM YOU

- The client, the industry, and roughly who they should be talking to
- A cadence — how many episodes a month
- Whether you want your brand on it or ours

That is genuinely it. Guest sourcing, scheduling, recording, editing, writing, publishing and syndication are ours.

NEXT STEP

Book 30 minutes and bring one client you have in mind. We will walk the process end to end on that specific account and tell you what it would produce.

- **Book a call** tidycal.com/unscriptedpodcasts/podcast-process
- **The service page** seoarcade.com/white-label-podcast-service/
- **How the SEO works** seoarcade.com/podcast-seo/
- **Rate card** seoarcade.com/pricing/
- **Email** jeremy@seoarcade.com

Jeremy Rivera has been doing SEO for 19+ years and hosts the Unscripted podcast network — the same production process this service runs on, used on our own shows first.
